

The “Green Way to Sustainable Development” project is worth 4.628.535 euros, supported by a grant of 3.934.254,75 euro from Island, Liechtenstein and Norway through EEA Grants 2009 – 2014 and cofinanced with 694.280,25 euros by the Ministry of Environment, Waters and Forests, Programme Ro07 Adaptation to Climate Change.

Why do we need an adaptation strategy?

Climate change is already an important issue for life on our planet, with its negative effects on economy, society and environment both globally and locally.

What is the purpose of the Strategy for adaptation to climate change ?

Reducing the ecosystem and human vulnerability to actual or expected effects of climate change, through solutions to adaptation of vulnerable sectors identified in every municipality and involving the civil society, the business environment and local authorities in implementing those adaptation measures.

Adaptation to climate change will be implemented mainly in the vulnerable sectors identified with high priority in the municipalities of Sibiu, Brașov and Târgu Mureș, according to the following:

Strategies and action plans regarding adaptation to climate change

Municipalities of Sibiu, Brașov and Tg. Mureș
